

Xiaochen (Eden) Yang

SUMMARY

UX designer with a background in Applied Psychology, specializing in crafting user-centric, responsive websites and applications using Figma. Passionate about integrating psychological principles into design, I strive to balance user empathy with business objectives to create intuitive and impactful digital experiences.

EXPERIENCE

Focumon - UX Design Intern

Remote • 08/2024 - 01/2025

- Enhanced usability by redesigning the onboarding process and the library interface
- Designed and created detailed mockups and interactive prototypes to visualize design concepts
- Worked closely with developers throughout the software development life cycle.
- Participated in brainstorming sessions with cross-functional teams to explore innovative solutions.

Penn State University - Research Assistant

Erie, PA • 02/2022 - 08/2022

- Conducted human-subject experiments properly by adhering to health, safety, and environmental regulations from the institutional Review Board (IRB)
- Developed a comprehensive research methodology and administered an online survey using Qualtrics
- Compiled and synthesized survey data, conducting in-depth statistical analysis using SPSS to test hypotheses and identify key insights
- Delivered research findings at professional conferences and seminars, effectively communicating key insights to audiences
